ISSAH ABDULSALIM BORESAS

Full-Stack Developer

PROFESSIONAL SUMMARY

Full Stack Developer with 5 years of experience building scalable web applications. Strategically integrates AI-assisted development tools (e.g., Copilot, CLI assistants, AI-powered debugging) to boost productivity, improve code efficiency, and streamline both front-end and back-end workflows. Adept at collaborating in agile teams to transform requirements into robust, user-focused solutions. Passionate about leveraging cutting-edge technology and clean code principles to deliver superior results faster.

PROJECTS

ProjectFreeStress

A web-based platform where students can buy, request, and sell academic projects.[\[view\]](#)

Study Planner

A web application helping students manage study schedules, join study groups, and track tasks efficiently.[\[view\]](#)

MCH Yeji Website

Designed and developed a responsive website for Mathias Catholic Hospital featuring appointment booking, job applications, and HR & Doctors Dashboard.[\[view\]](#)

AI-powered Glaucoma Detection

An AI-powered Glaucoma Detection app using Vision Transformer (ViT-B/16) and ResNet50 deep learning models, achieving 81% accuracy on retinal fundus image classification.[\[view\]](#)

Social Media Fraud Account Detection

Built a machine learning system using Random Forest, Logistic Regression and Decision Tree models to detect fraudulent social media accounts by analysing user behaviour patterns, profile data, posts and network interactions.[\[view\]](#)

EDUCATION

University of Energy and Natural Resources (UENR)

BSc. Information Technology | School of Science
2023 – Present | Sunyani, Fiapre
